

Apprenticeships and Workers with Disabilities

August 20, 2025

Today's Presenter

Ellice Switzer

Senior Extension Associate

Development and Dissemination Team

Employer Assistance and Resource Network on Disability (EARN)

Today's Objectives

- Learn key insights about the prevalence of disability within the working-age population.
- Discover why you should consider partnering with a Registered Apprenticeship (RA) program.
- Discuss strategies to ensure apprentices with disabilities can be successful, including the benefits of reasonable accommodations.
- Find resources and partners to help build a pipeline of talent.
- Get tips on creating a workplace where people feel comfortable asking for support when needed.

What is a Registered Apprenticeship? (1)

- Combines classroom instruction with on-the-job training
- Leads to nationally recognized credentials
- Allows apprentices to earn while they learn and graduate with zero debt
- Helps to bridge skill gaps and bring new talent into the workplace

EARN

What is a Registered Apprenticeship? (2)

- Exists in “blue-collar” and “white collar” career fields such as traditional trade (carpentry, mechanics, etc.) and corporate positions (IT, energy, biomedical, etc.)
- Many military jobs are apprenticeships!
- Apprentices, upon graduation, earn over \$84,000 annually
- 94% of apprentices who complete a Registered Apprenticeship retain employment³

Historic Growth in Apprenticeships

- The U.S. Department of Labor (DOL) recently awarded \$84 million to expand registered apprenticeships in many key industries including manufacturing, construction, and emerging sectors like technology and artificial intelligence⁴
- 88.5% growth in apprenticeship participation since 2015²
- 115% growth in apprentices under the age of 24 since 2015²

Apprenticeship + Disability Strategy = Talent Solution

- Expanding apprenticeships is good for business and solves critical talent shortages.
- People with disabilities are an untapped source of talent.
- Considering universal design can improve completion and job retention rates.
- Welcoming workplaces improve retention rates across the entire workforce.

Apprenticeship and Disability: Why Does it Matter?

- People with disabilities are roughly 11% of the working-age population.⁵
- Fewer people with disabilities attend college.⁵
- More than 944 thousand job seekers with disabilities are actively looking for work nationwide.⁵
- A study of students in Washington State found that nearly three-quarters (73%) of 12th graders with learning disabilities participated in career and technical education (CTE) programs.⁷
- More than 30% of youth with disabilities are not working and not in school.⁶
- Only 1.2% of apprentices reported having a disability in 2025, but 49% did not respond yes or no.²

New Technologies – New Opportunities

- Advances in technology are helping to make workplaces more accessible.
- A wide variety of occupations are "apprentice-able" and could be designed to include apprentices with all types of disabilities.
- Most people with disabilities require no or low-cost accommodations to perform at the same level as those without a disability.
- Proactive attention to accessibility and universal design will benefit all apprentices (and workers).

Universal Design and Universal Design for Learning

Universal Design:¹

- Originates from the field of architecture
- Aims to create environments that are physically accessible for all
- Can be applied to training facilities and work environments

Universal Design for Learning:¹

- Plans for learning differences
- Encourages educational content that differentiates instruction
- Considers cognitive and digital accessibility
- Allows flexibility in demonstrating skills and knowledge

Universal Design, Accessibility, and Accommodation

- Enhancing accessibility of the workplace has the potential to positively impact the experience and outcomes of all apprentices with disabilities (identified or unidentified).
- Implementing strategies that may have a positive effect on the success of the workforce is more likely to be sustained by programs and instructors.
- Universal design may help maximize the overall completion rate of registered apprenticeships.
- This could aid in successful job placement and retention.

Case Example: FALA Technologies

FALA Technologies: Manufacturing Career Opportunities

- Created out of a need for workers in an advanced manufacturing corporation
- Partnered with local disability focused agency to develop an apprenticeship pathway model
- Credits employing workers with disabilities for saving 100+ year old family business

Recruitment and Outreach (1)

State Vocational Rehabilitation

- Provides supportive services at different career stages to help people with disabilities find and keep jobs
- Partners with employers who want to recruit, hire, and retain disabled workers
- Works with students who are eligible for VR services to provide pre-employment services, including work-based learning experiences (pre-apprenticeships)
- Coordinates national business services via the National Employment Team (The NET)

Recruitment and Outreach (2)

American Job Centers (AJCs)

- Located in communities throughout the country
- Offer centralized employment and training services
- Offer programs and services that support employers and job seekers alike (WIOA, WOTC, TANF, etc.)

Department of Veterans Affairs (VA) Veteran Readiness and Employment (VR&E)

- Helps employers across the country fill workforce needs with pre-screened, job-ready disabled veterans

Community-Based Agencies

- Can be national, regional, or local
- Serves job seekers with disabilities
- Can provide additional support and assistance and business services

Tips for Recruiting

- Get involved with state and local workforce investment boards.
- Connect with people who assist the job-seeking population in the area where you need workers.
- Partner to develop competency models and pre-apprenticeship programs.
- Connect with your local Disabled Veteran Outreach Program representative at the local workforce center (AJC). If there is not one in your area, please contact the National Veterans Training Institute (NVTI) to be connected to one.
- Ensure your online presence is digitally accessible.
- Take a disability-informed approach when recruiting and hiring using artificial intelligence.

Think Beyond Training

- Create a plan to ensure apprenticeship graduates can also be successful in careers - **training is not the end.**
- Put supports in place for their transition from apprentice to journey person.
- Talk to them about a career ladder (e.g., master technician, trainer, etc.).
- Consider implementing a mentorship program that allows apprentices to shadow master tradespeople and benefit from their advice and experience.

EARN Funding Statement

The Employer Assistance and Resource Network on Disability (EARN) is a resource for employers seeking to recruit, hire, retain, and advance qualified employees with disabilities. This publication is fully funded by the U.S. Department of Labor's Office of Disability Employment Policy (ODEP) under cooperative agreement No. 23475OD000002-01-00 with Cornell University. The total five-year cost of this agreement amounts to \$10,000,000. This document does not necessarily reflect the views or policies of the U.S. Department of Labor, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.
